

SAVE YOUR SENSITIVE DEVICES FROM SHOCK WITH GuS TRANSPORT & STORAGE CONTAINERS

For 30 years GuS is offering transport and storage containers. These containers ensure a safe transport for sensitive to shock military products, such as optical devices like periscopes or microchips. Transport containers can be used several times. GuS supplies 14 different types of storage containers. These are under permanent quality inspection to meet customer requirements. The storage containers come in colored bronze/green, but can be colored according to customer needs. All containers are filled with insert plastic foam which is re-orderable.

KEY FEATURES

- Resistant against water-vapour
- Resistant to shock
- Manufactured acc. to VG 95614
- 14 different types available
- Re-orderable plastic foam
- Available with or without NSN codification
- Bronze/green (RAL 6031)
- Special colours are available
