

GLASS + SAFETY

## SAVE SPACE WITH FOLD-AWAY PERISCOPES MADE BY GuS

In many armored vehicle applications space is a premium. GuS has developed the fold-away periscope, whereby a flap mirror replaces the bottom part of the fixed standard periscope.

Three reasons to consider a fold-away periscope:

1. The flap unit can be folded away to save space
2. The mirror allows for individual adjustment
3. Higher angles allow for wider vertical area of sight

An advanced flexible version is a pull-out telescope that can be adapted to the eye level and is thus more ergonomic for the end user.

All fold-away periscopes can be certified in accordance with the national standard TL6650-0029, the international standard MIL 62420B (AT), as well as STANAG 2895.

If you require a sample or more information contact us at [info@gus-periscopes.com](mailto:info@gus-periscopes.com).

M27J Head with fold-away mirror and soft darkening

### ADDITIONAL FEATURES

- Available for all current and future configurations
- Additional protection caps & blackout blinds available
- Laser protection for various levels available
- Heating systems for de-icing & demisting
- Different housings are available
